2a. Proposal for Changes in Time to Degree and Readmission Policy

Students have a maximum of ten years to complete their undergraduate work in the College of Liberal Arts and Sciences under degree requirements in effect at the term of matriculation. Students experiencing a break in enrollment during these ten years will follow their curricular requirements at the point of matriculation provided that the break in enrollment does not exceed two calendar years. Students readmitted two years are held to the curricular requirements in place at the term of readmission.

*Suggested inclusion (for students taking one course/term):* Students maintaining continuous enrollment but who do not complete their degree requirements within ten years, may petition the College to complete their degree requirements under the curricular requirements in effect during the term of admission.

2b. Proposal for Changes in Early and Continuous Enrollment Policy

Undergraduate students enrolled in the College of Liberal Arts and Sciences are expected to make timely progress towards completing their degree requirements. In an effort to have students remain compliant with the requirements of the KU Core and the College, students are required to complete the Written Communication and Quantitative Literacy and Reasoning requirements of both the KU Core and their degrees within the first year of undergraduate study.

Written Communication – Students are expected to enroll in two courses that meet Goal 2, Learning Outcome 1 of the KU Core in their first year of study. Students should pay close attention to their degree specific requirements (such as for the Bachelor of Arts) given that certain degrees require specific Goal 2, Learning Outcome 1 courses despite advanced standing in writing courses due to examination scores. To ensure compliance with this policy, students may be administratively registered for courses if the College determines that they are not on track to complete this requirement in the first year of study. If a student is found to be in non-compliance with this policy, the College retains the right to place a hold on their records to prevent future registrations.

Quantitative Literacy and Reasoning - Students are expected to meet the requirement of Goal 1, Learning Outcome 2 of the KU Core in their first year of study. Students should pay close attention to their degree specific requirements (such as for the Bachelor of Arts) given that certain degrees
require specific Goal 1, Learning Outcome 2 courses to meet both KU Core and degree specific requirements. Students pursuing the Bachelor of Arts degree are required to take a second Quantitative Reasoning course beyond the requirements of the KU Core. To ensure compliance with this policy, students may be administratively registered for courses if the College determines that they are not on track to complete this requirement in the first year of study. If a student is found to be in non-compliance with this policy, the College retains the right to place a hold on their records to prevent future registrations.
