No

Title: Transnational Terrorism

Transcript Title: Transnational Terrorism

Effective Term: Spring 2017

Catalog Description: The course provides a study of the patterns of transnational terrorism. First, it introduces students to the analytical study of terrorism. The course traces the evolution of terrorism, from the French Revolution to the modern day era. It also covers how scholarship defines, conceptualizes, and measures terrorism. The second goal is to introduce students to key scholarly debates within the literature. Some of the example questions we ask are: are democracies more vulnerable to terrorism? Does globalization render states open to being attacked by transnational actors? Is torture warranted as an effective counterterrorism tactic? The readings draw on empirical scholarship on the causes and consequences of transnational terrorism.

Prerequisites: None

Cross Listed Courses:

Credits: 3
Course Type: Lecture (Regularly scheduled academic course) (LEC)
Grading Basis: A-D (+/‐)FI

Typically Offered: Once a Year, Usually Spring

Repeatability for Credit: No

Will this course be required for a degree, major, minor, certificate, or concentration?
No

Rationale for Course Proposal: There is no course that covers transnational terrorism. Prof. Markel’s course on “Extremist Groups” overlaps with the Topics course I’ve been teaching in some aspects. However, the course I offer focuses on transnational terrorism and the connection between terrorism and foreign policy. Previously taught as a topics course.

Course Reviewer Comments: Kristine Latta (klatta) (04/11/16 5:26 pm): Rollback: The course description is truncated. I assume this is because it exceeded the character limit. The only text that should appear in that section is what you want to appear in the catalog and schedule of classes. Any explanatory text can go in the rationale section.

Program Description

M.A. in Applied Behavioral Science Degree Requirements

The master’s program trains highly competent scientist-practitioners in applied behavioral science. It requires course work on the basic principles and conceptual foundations of behavioral science and its research methods but emphasizes course work and training in applied and intervention research (e.g., assessment, analysis, intervention, evaluation). Its objective is to advance empirically based solutions to problems of individual and societal importance, both local and global.

The master’s program follows a junior-colleague model. Students work closely with their advisors and join them in many aspects of professional development. This includes designing and conducting research, preparing manuscripts for presentation and publication, presenting and publishing those manuscripts, and engaging in all facets of the responsible conduct of research. Students typically work with one advisor, but may work with other faculty members or have co-advisors. If a student’s or advisor’s interests change, students are free to change advisors.

The M.A. degree requires 33 credit hours: 18 hours in 6 content areas, 3 hours in a practicum, and research and elective courses. Students also must conduct, write up, and orally defend an empirically based thesis. The following 6 courses are required:

A. Course work is required in each of the following areas: Ethical, Legal, and Professional Issues (3). Instruction in ethical principles in the conduct of research...
(e.g., informed consent, data analysis), legal issues in professional conduct (e.g., plagiarism, copyright), and professional skills (e.g., journal reviewing, professional communication). **ABSC 841**

B. **Principles of Behavior I** (3). The science of behavior (e.g., observation, experimentation), laboratory methods, basic behavioral principles (e.g., reinforcement, stimulus control), and their applications (e.g., early childhood, disabilities). **ABSC 861**

C. **Ethical, Legal, and Professional Issues in Applied Behavioral Science** (ABSC 841) **Research Methods I** (3). Strategies and tactics of scientific research (e.g., objectivity, empiricism), the logic of experimentation (e.g., validity, reliability), measurement and direct observation, and experimental designs for single-subject and time-series analyses. **ABSC 735**

D. **Conceptual Foundations I** (3). The history and philosophy of behavioral science, contemporary advances in basic research for application, the analysis of everyday behavior (e.g., cognition, emotion), and current issues in the discipline and the profession (e.g., relations between basic and applied research). **ABSC 800**

E. **Applied Behavior Analysis I** (3). The characteristics of applied behavioral research (assessment, analysis, intervention, evaluation), intervention research (clinical, community), applied procedures and programs, social validity, and ethical issues. **ABSC 746**

F. **Experimental Analysis of Behavior** (3) **ABSC 799**

G. **ABSC 746 Introduction to Behavioral Science Experimental Analysis of Behavior** (ABSC 799) **Research or Intervention Practicum** (3). A supervised practicum course in either basic or applied research or behavioral interventions.

This course work also satisfies 6 of the course requirements and the thesis requirement in the doctoral program.

Master’s students are required to present the results of their research at a department professional seminar meeting. The presentation is comparable to what would be presented at a professional conference. Students answer questions from their peers and the faculty in attendance.

---

**Rationale for proposal**
The Principles of Behavior I requirement was mistakenly removed during the last program change.

**Additional Information**
I am working in the system with A.N. in order to proactively address any system errors.

### Ph.D. Degree Requirements

Ph.D. aspirants shall, prior to admission to the Ph.D. comprehensive examination, demonstrate knowledge of at least one foreign language.

---

https://next.catalog.ku.edu/courseleaf/approve/
Ph.D. aspirants shall, prior to admission to the Ph.D. comprehensive examination, demonstrate knowledge of at least one foreign language sufficient to meet the demands of their research and have successfully completed at least one 700 level or above History of Art seminar course in fulfillment of Graduate Studies’ Research Skills and Responsible Scholarship requirement. Candidates must satisfy all general requirements. Ph.D. students may be required by their committee, prior to admission to the Ph.D. comprehensive exams, to candidates must demonstrate proficiency in two or more 2 research skills (normally foreign languages, depending on language) relevant to their research; this requirement must be met before candidates are admitted to the student’s area of specialization and program of study. Comprehensive Ph.D. examinations. One of the 2 research skills is usually the foreign language that met the M.A. language requirement. Normally, Ph.D. students are expected to complete 18 to no fewer than 21 and no more than 27 post-M.A. hours and Normally, Combined M.A./Ph.D. students are expected to complete 12 to no fewer than 15 and no more than 21 post-M.A. graduate course credit hours. The exact number of required post-M.A. courses will be determined in consultation with the student’s committee. These credit hours must be taken at the graduate level. The graduate faculty reserves the right to require more than 27 post-M.A. course credit hours when appropriate. Normally, Combined M.A./Ph.D. students are expected to complete no fewer than 15 and no more than 21 post-M.A. course credit hours. These credit hours must be taken at the graduate level. The graduate faculty reserves the right to require more than 21 post-M.A. course credit hours when appropriate. Students must take both written and comprehensive oral examinations at the end of their course work. Both written and oral examinations cover the major area and 2 minor areas specified in the student’s Doctoral Program of Study petition (see department’s Graduate Student Handbook). The oral examination normally follows the written examination by 1 week. 2 weeks. The dissertation proposal must be approved by the student’s primary advisor and the graduate faculty within three months of passing the comprehensive Ph.D. examinations. The student is strongly encouraged to work closely with his/her primary advisor immediately following the comprehensive examination to meet this deadline. Upon acceptance of the dissertation in final draft form, the candidate must successfully pass the final oral examination (the dissertation defense) to complete the degree.

Research Skills & Responsible Scholarship Requirement
All graduate seminars include instruction in and discussion of appropriate research conduct and research misconduct; authorship, publication, plagiarism, copyright; peer review; and professional practices. For more information on the Research Skills and Responsible Scholarship requirement, please see the Graduate Studies section of the online catalog.

Handbook for Graduate Students
A detailed presentation of departmental degree requirements and regulations is included in the department’s Graduate Student Handbook, available online.
